By tapping the Display Item button on the top left of KDS, you switch the KDS to the item mode. In this mode, you can see how many repeated items are there in all receipts. It is convenient for the cook to cook lots of same items at the same time.

Chapter 8: Reserve IP Address for Phone/Tablet

We strongly suggest reserving IP Address for Phone/Table, so that IP Address will not change when you restart PC or router. To assign local static IP to your phone/tablet, here is the sample of how to assign static IP in your tablet.

			🛜 🛿 9:12

Chapter 9: Problem & Solution

1. Phone/tablet are in sleep mode when user has not recently interacted. Some devices may turn off Wi-Fi connection in the sleep mode. KDS or POS app cannot connect if Wi-Fi is not turn on. In this case, you need to disable sleep mode in your device (Settings>Display>Screen timeout>Keep screen turned on).
